

Candle Holder

Materials:

- clean, empty can with paper wrap removed and the bottom removed
- water
- felt marker
- nail
- hammer
- spray glitter paint

Instructions

1. Fill the can with water and freeze until totally solid
2. mark a pattern in the shape of a star, Christmas tree, bell or other appropriate shape by making dots to form the shape - mark as many patterns on the tin as you need to fill all sides of the can
3. using the nail and hammer pound out each dot (the ice will prevent the can from collapsing)
4. When the pattern is completely punched let the ice melt
5. Thoroughly dry the can
6. Lightly spray the can with glitter paint and let thoroughly dry
7. Place the can over a small candle and candle holder - making sure that the candle has at least an inch or two of space on all sides from the sides of the can to prevent the can from becoming hot
