

Sun Nature Picture

- Take your unit out for a walk in the early spring and let them gather different pieces of nature. Leaves, grass, acorns etc.
- Place these items on a black piece of construction paper and spritz with a light mist of water all over the paper. (dampen not soak your paper)
- Leave you paper in the direct sun for about 45 - 60 minutes.
- After this time when you remove the objects you should be able to see a distinct difference between where the objects were and where the sun and faded the surrounding paper. You now have a nature picture without ever using crayons. Just plain nature!!
