

## Spray Bottle Nature Art Instructions

1. Each girl will need a piece of heavy paper.
2. Collect nature items and place over the page.
3. You may need to weigh down the items with small pebbles.
4. Fill several spray bottles with paint.
5. You will need to add water to make the paint thin enough to pass through the spray bottle. Be sure to set the spray bottles to “mist” to ensure an even distribution of paint.
6. Girls will spray their paper with different colours of paint.
7. Once dry, remove the natural items. These areas will show up white under the paint
