

Snow Sun Catchers Instructions

1. Distribute an aluminum pie-plate to each girl.
2. Gather some items that birds need during winter. Good suggestions include seeds and pieces of cut-up apple, cranberries and pieces of yarn.
3. Place the seeds and fruit in the bottom of the pie plate.
4. Drape the yarn artistically in the bottom of the pie plate.
5. Make one larger loop with a knot and drape it halfway in the pie plate and halfway outside. It will become the loop for hanging the sun catcher.
6. Pour a shallow amount of water in each pan and let it freeze outside.
7. Hang the sun catchers from a branch. They will let in the sun and, as they melt, birds can find food and bits of yarn for nests.
