

### **Hoola Hoop Nature Study Instructions**

1. Each girl will need a clipboard with a sheet of paper.
2. You can easily make mini clipboards using a small piece of corrugated cardboard about 15 cm x 15 cm.
3. Secure some small pieces of paper to the cardboard using a binder clip.
4. Give each team of girls a hula hoop (or a piece of string that they can shape into a loop).
5. Each team will place their hula hoop on the ground (spread out).
6. Let them examine their area inside the hoop.
7. Give some guided questions: what kind of life do they see? What shouldn't be there? Sketch the signs of life they see etc.
