

Giant Bubbles Instructions

1. Make a bubble solution and have girls make their own bubble wands out of pipe cleaners.
2. Larger bubbles can be made with string and plastic drinking straws.
3. Take two straws and thread a long piece of string (at least 40-50 cm) through both straws.
4. Knot the ends together and slip the knot into the straw.
5. Stretch the two straws apart to make a square.
6. Soak in the solution and make huge bubbles.
7. You can make human sized bubbles by filling a small wading pool with bubble mixture and asking a girl to step inside.
8. Slip a hula hoop over the girl and into the bubble solution.
9. Slowly pull up the hula hoop (you may need help) up around the girl for a human sized bubble!
