

Leaf Rubbing Instructions

1. Find some leaves outside and flip them upside down so that the veins are facing upwards.
2. Place a sheet of paper over top of the leaves.
3. Take a wax crayon and remove the paper wrapping.
4. Holding the crayon in the middle, rub the entire length of the crayon overtop the leaves.

You can also use thicker paper for this activity to make greeting cards. These cards are perfect for overseas recipients.
