

Shine Your Guiding Light Campfire **for World Thinking Day**

Materials

- Craft Sticks (2-4)
- Glue and/or hot glue and glue gun
- Scissors
- LED tealight candle
- Construction paper cut into thin strips using the longer side of the paper (any colours you like, 6-8 strips)
- A ribbon, string, or small elastic to tie the top of your campfire

Instructions

1. Put a dab of glue in the centre of a craft stick and glue the sticks together to form a star or criss-cross shape. This will be the base of your campfire.
2. Cut the construction paper into thin, long strips. You will only need about 6-8 strips as you need to leave room for your tealight to shine through.
3. Glue your construction paper strips together to form a star or criss-cross shape just like your craft stick base by adding a dab of glue to the centre of each strip.
4. Once your construction paper “star” is dry, carefully bend each tip upwards until you see your campfire form.
5. Get the help of a friend to hold the tips so you can tie a string tightly at the top to hold your campfire together.
6. Glue your campfire bottom onto your campfire base.
7. Once dry, place your LED tealight candle inside.
8. Shine Your Guiding Light campfires and celebrate World Thinking Day with your friends.
