

Human Memory Game

submitted by: Glenda Barrera Contact Guider 43rd Guides

Have 1 or 2 girls leave the room.

The rest of the girls must pick a partner that they don't usually hang around with.

Give the girls a theme ie. animals; ocean; Christmas; and etc..... then, they must create a sound with their partner.

Once all the girls have their sounds, no two pairs can have the same sound. They run and lay face down like a card.

The girl(s) who left the room are then called in

Then one at a time they take turns trying to find the pairs.

They must walk up to a card and gently tap her on the head, that girl must then sit up and say her sound.

She remains sitting until the person that is IT has tapped another girl on the head, that girl repeats the same procedure

if the pair matches they stand off to the side until all the pairs have been collected.

If the sounds do not match the girls then lay back down and the game starts again.

My girls love to play this quieter game!!!!
